

The goals, objectives, and implementation strategies (GOIS) table summarizes the actions that will be undertaken in the coming decade to achieve the vision identified in each element. Element goals are broad-based ideals that are intended to guide the future of the community, while an objective is a more specific elaboration of a goal that also provides direction. Together the goals and objectives outline the framework for the element and provide the basis for the more detailed and specific plan strategies. Each supporting implementation strategy includes a listing of the entities that are accountable for the implementation of the strategy, as well as a timeframe for completion. This new article includes goals, objectives, and implementation strategies updated for the five-year Comprehensive Plan review that reflect those from the 10-year Plan that are still relevant, that have not yet been accomplished, and that are ongoing.
